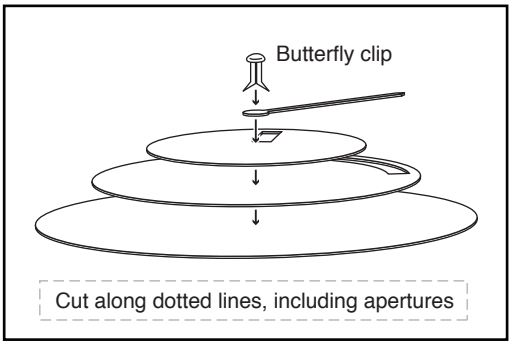
Physics
Water runs uphill, but does not float.
All liquids are combustible, except for pure water.
The sun is pink and the sky is purple.
There are portals which link to one another.
There is no wind, and the air only moves slowly.
Time passes faster the deeper you go underground.
Land masses move regularly.
Grasslands cover the world.
The world is entirely volcanic.
Small islands are the only dry land.
Deserts cover the world.
There is no magnetic pole.



Butterfly clip
Cut along dotted lines, including apertures

Geography
